----------------------	----------------------------	---------------------------	------------------------	-----------------------------	--------------

Payment Details: (Full payment required upon booking)

We will email you an invoice. Payment is typically done by bank transfer.

General Conditions

- Please let us confirm that a space is still available for you before booking flights, hotels etc. Spots are limited and sometimes fill up very quickly.
- Your payment is non-refundable, but if you have to cancel or postpone, 40% will be refunded or held in credit if your cancellation for the workshop you registered for, is received at least 8 weeks prior to the starting date. **In the unlikely event of Geovital needing to cancel the workshop, your workshop payment is of course refunded in full. We can unfortunately not take responsibility for cost of pre-booked travel or accommodation.**
- During the workshop, training shall be provided about the different areas of assessment used in a 'Geovital' home assessment. Most of this is considered easy to remember but does require practice to improve one's skills. **Our aim will be to make you as comfortable as possible doing an assessment** and have the basics skills in order to fine tune your abilities on your own. **Especially the detection of Geopathic Stress often requires additional practice.** You will understand the workings, you will practice with us, but we cannot guarantee you will master this skill by the time you finish the workshop. Most people do, or do shortly after.
- The workshop involves theoretical components but also a **large 'in-the-field' component.** This could be in grass, maybe wet/cold/hot/sunny, maybe in rain, so **please bring appropriate clothing, sunscreen and shoes. We cannot be held liable, and you agree to not hold us liable, for damage to yourself or your property.** If you feel uncomfortable or concerned please tell us and we will try to improve the situation for you.
- Transport is provided for the field trips, but at your own risk and we cannot be held liable for any injuries or accidents suffered during or in relation to this transportation regardless of who is at fault. If you do not wish to be driven, please organise your own vehicle in order to follow ours.
- If you have **known allergies or intolerances**, please tell during registration for the workshop.
- Neither Geovital Akademie Austria, Geovital Academy Australia (trading name of Blue Remora P/L), Blue Remora P/L or its representatives are liable for any personal injury or damage or theft of your belongings. Care is taken to provide a safe training environment. During the classes you may be exposed to EMF sources in our environment like phone towers and power lines. Advise about suitability of products in certain situations is based on our in-house experience and research. This advise is given with the best intent and felt to be suitable at the time, but we cannot be held liable that product related advise is 100% accurate or that the advise may not be accurate in the future.
- There is no prerequisite for doing this workshop. Prior health care knowledge helps to relate to patients/health clients, but is not needed. The aim of assessments is to discover excessive radiation and make protection solutions available where needed. Shielding has shown to improve the quality of life for many people but may not result in the health improvements people are hoping for in all cases. **Geovital assessors can and should not make any promises or claims about what shielding will do for the health issues of individuals.**
- The workshop is hosted by Geovital Academy Australia (Blue Remora P/L) and financial payment are payable to Geovital Academy Australia.
- During the coaching within the formal training or informal guidance outside of the formal training duration during and after this course, you may possibly be given access to knowledge about business related Geovital approaches, strategies, documents and business agreements. By signing this registration form, you agree to this functioning as a **confidentiality statement** and you agree to not share, broadcast, make public or do anything else with the information gained in this coaching relationship that can **harm our reputation or affect our complete edge in the marketplace.** The information is provided to you for your use or information only. You understand that if this material (including video or audio recordings) was found to be distributed by you, you are liable for (potential) damages this may have or could cause. **We agree that the maximum amount of damages will not exceed a value equivalent to € 250,000 (euro).**
- Even though the range of illnesses that people have recovered from by being in an environment protected by our products, neither Geovital Akademie Austria, Geovital Academy Australia (trading name of Blue Remora P/L) or any Geovital Academy representatives are making claims that these products will heal any illnesses. **These are protection products, not medical devices, medicine or a treatment.** During the workshop products may be available for purchase.

Changes of Conditions are possible with exclusion of the confidentiality clause. E&OE (February 2017)
